

ABSTRACT

A medical image processing system for visualizing plural medical images of a subject in multi-format on a single plane on one of a film sheet and a screen, comprising: a radiographing section for radiographing the subject so as to generate plural sets of image information in which each set of image information includes medical image information and radiograph-related information related to at least one of the subject and the radiographing section; an extracting section for extracting plural sets of radiograph-related information from the plural sets of image information; a calculating section for conducting calculation for the plural sets of radiograph-related information so as to obtain new radiograph-related information; and a visualizing section for visualizing the plural sets of image information with the new radiograph-related information on the single image plane.
